OPENING OF BIDS FOR REBUILDING OUR NAVY.

The Successful Bidders and Amounts Asked-An Increased Demand for American Tuols in Mexica-No Appointments

in the Interstate Commission-Notes. IlWashington, March 23.-Bids were opened by the secretary of the navy to-day for furnishing 1,310 tons of gun steel and 4,500 tous of steel armor plates for naval purposes'in connection with the manufacture of ordinance and the construction of new vessels. The amount available for the work is \$2,275, 000. For the gun steel the Midvale Stee company bids \$1,397,240; the Cambria from company bids \$851, 513, and the Bethleham Iron company \$962,230. For supplying armor plate, the Bethlehem from company bids \$3,610,707, and the Cleveland Rolling Mill company \$4,021,561.

Although the bids are in excess of the appropriation, there is no doubt that contracts will be made for as large in amount of the department can expend. Secretary White ney is agreeably surprised that such favorable figures should have been secured. The bids of the Bethleham Iron company are accompanied by a letter describing their facillties for performing the work, which letter Secretary Whitney says is very satisfactory and gratifying. The letter sets forth that the Bethleham Iron company has been most diligently engaged for more than a year in constructing a complete plant of forgoing machinery and tools adapted to the Inbrica-tion of all the parts of the largest gans used in part of the world, and of the shafts that may be required for vessels of any size that the United States government may require.

The establishment when completed will be in every respect fully able to compete with any establishment in Europe. The company has, up to this time, expended in each on the forging plant alone between \$300,000 and \$400,000, and it is under contract obligations to the extent of \$500,000 additional for unachinery and tools, to be delivered within the current year. The amount required to complete the plants for both gnns and armor plate will be in all about \$1,500,000, and for his the ilmancial arrangements are completed. The company owns or controls a large deposits of ore peculiarly suitable for meh iron as is needed for steel forgings, so that it is certain of ohtalning the best and most mulform quality of metal. The company is now turning out about 4,500 tons of

Demand for American Tools.

WASHINGTON, March 23 .- Secretary of State Bayard has received from Mr. Allen, United States consul at Piedras Negras, Mex., a communication to the effect that there exists an increasing demand for Amerlean agricultural tools, particularly the American plow. The principal o stacle in he way of the development of our trade with Mexico, he says, is found to be the distrist intertained by a large proportion of the Mexicans toward our people, but the incoming of a latter class of Americans is effecting a change for the better, and the consul be loves that before long confidence will take the place of distrust, and full recognition of community of interests be established.

A WARNING TO CANADA.

Awakening of the Public Mind to the Dan-

ger She is Rushing Into. St. John, N. B., March 23.-The Globe prints the following editorial: "The country will soon wake up to the folly of the policy of the government in regard to the figheries. The Journal at one thue, almost single handed, from the first dissented from that policy. It was a policy which begau in neglect, has been followed in ignorance, and is now being pushed to the verge of what almost seems like insanity. We are glad to see some signs in the press that there is au nwakening of the public mind to the danger

which is threatening the country.
"On the third of March, when the retaliatory bill passed the congress of the United States, we pointed out what its effect would be. It the president puts any part of the machinery of that bill in force he will strike a blow against the sole surviving interest here which is at all pecuniarily beneficial—our coasting irade with the United States. The papers in western Canada appear to think that because their interests are not menaced there is no danger to the country

"We again warn people of the maritime provinces that their best interests are 101perlied, that the first act on the part of our officials to harass American trade such, as a refusal to sell bait, to carry fish over cur railroads, to enforce recklessly our customs regulations ugainst American fishermen, will in all probability compel the president to put into force the law, and that the burden will fall upon the vessels and trade of these three provinces."

Tire Murderous Bald Knubbers.

St. Louis, March 23 .- Six of the Bald Knobbers who have been in confinement at Ozark, charged with being implicated in the murder of Eden and Green, have been re-leased on \$1,000 and \$2,000 bonds, it being shown that they were not directly con cerned in the killing. Several of the pris oners in the Springfield jail made a bold attempt Sunday night to escape. They dug through the floor of their ceil and had tunneled some eight feet when they were discovered by Sheriff Do.lsan and their scheme frustrated. Four of them were Bald Knobbers. It has been revealed that the Bald Knobbers kept a regular vengeance book in which were recorded the names of persons marked for some kind of persecution or pun Ishment. It was the custom for members at their various meetings to prefer charges agninst individuals outside of their order and then those present voted what sort of punishment should be meted out to them.

Heavy Damage From Frost.

COLUMBIA, S. C., March 23. - The temperathre has been falling steadily for the last five days, and comminated yesterday in a freeze, which has perhaps wiped ont over \$100,000 of value on the truck farms in the vicinity of Caarleston. The mercury yeste day morning at 6 o'clock indicated therty five degrees, and in exposed places reaches the freezing voiut. There can, therefore, b no further doubt of the fact that a stagge. ing blow has been inflicted upon the growing fruit and vegetable crops, although it will inimpossible to estimate the extent of the damage for a day or two yet. The freeze was general throughout the coast best of the state, and what promised to be a most successful and remunerative crop has been so injured and delayed that Charleston truck farmers, who, ten days ago were counting up their prospective profits, are now trying to figure out the chances of getting out

The Harrison Monument.

CINCINNATI, March 23. - The passage of the bill in the legislature at its closing hour, anthorizing the commissioners of Hamilton county to spend \$25,000 for a monument to Gen. THE MAD MISSOURI RIVER.

TERRIBLE DISASTER BY FLOOD AT MANDAN, DAKOTA.

Che River Contes to a Stand at Bismarck, After Having Reached Tweive Inches Higher Than Ever Before-Serious Trouble Feared at Points Below.

BISMARCK, Dak., March 23.—The river rose steadlly until the middle of yesterday afternoon, when it came to a stand-still, and it is now falling. It reached twelve inches higher than ever before. The river is now clear of ice. The water has flooded all the lower part of Mandan. A telegraph line will be strung along solid lee to Mandau as soon as possible. The rallroad tracks are now covered with ice. It will have to be cut

Those of the 300 delayed passengers now here who wish to cross the river will be transferred in boats. As soon as the water subsides sufficiently repairs will be made to the Northern Pacific bridge, which can be put in shape for use in two days. At 10 o'clock last night the river was stationary. There will be but little delay in travel from now on, whether the river subsides or not. People are continually passing between here and Manden in boats.

Parties who arrived from Mandan bring reports of a much worse flood in Mandan than has been described. The water has filled the basements of all business horses and many families in the lower part of the city narrowly escaped drowning. A family of husband, wife and two children, were taken from the attic of their house and were compelled to walk on the crust of ice for a quarter of a mile over water from ten to fifteen feet deep. The water is still rising. For over two miles, between Mandan and the river, no railroad track or telegraph poles can be seen, they having been swept away by the water. The citizens of the town are huddled together on high spots, and as the water is still rising they may all be driven to the bluff back of the town.

Editor Tuttle, of Mandan; Elitor Marny, of Miles City, and six others mined themselves with ropes and staves yesterday morning and left for Bismarck for Mandan across the ice. They tramped over two miles of broken ice, and after several of the party getting ducked, reached terra firms on the west bank. The greatest difficulty was experience i when near the Mandan side. The stream flowing neross at the hottom of Main street kept a channel open, and the walking was very precarious, and things looked treacherous, but the party fluilly landed. The trip from the trestle to the Mandan shore was mule in about an 'iour and a half. A good many of the streets are full in Mandan, but there is no suffering. The water is spreading over a vast extent of territory, and still rising slowly, but it is supposed the gorge will break before it rises much higher.

At Pierre, Dakota.

PIERRE, Dak., March 23.—The Missouri is rose six feet in six hours and the volume of ice choked the channel and threw huge blocks thirty feet square and three feet thick ten feet in the air. Fort Pierre, on the Sioux reservation and opposite Pierre, is partly submerged and the people are safely ensconced on the bluffs adjacent to the village. The rise exceeds that of March 27, 1881. As no gorge lms as yet formed Pierre is safe. Eleven o'clock found the river at a standstill, with the running ice growing gradually less. Fears are now entertained that the break at Bismarck will be the cause of great trouble, and the citizens are preparing for the worst, information has been received. from Fort Sully that the river was rising there two feet an honr.

No News From the Racing Inchts. New York, March 23,-Of the ocean steamships, which got in yesterday, only one, the stemmship Rugia, which arrived late last night, saw anything like either of the racing yachts, Coronet and Dauutless. The Rugin on Friday last, about 1,100 miles almost due east of New York, passed at 2 o'clock in the morning a vessel which, as the log says, showed a white, red and blue night signal followed by a blue light. Whether It was a steam or sailing vessel and whither boun I was not discovered. The New York yach club signal is red, green and white, gree might be mistaken for blue and the signs. may not have been carefully noted. The blue light which followed is the Dauntless distinguishing mark, and the vessel may have been the Danntiess.

A Sensational Story.

CHICAGO, March 2.3-Late last night Hur man Kuebler, who was for some time under arrest, suspected of the number of Freslerich Wirth, the missing butcher, came to the Twenty-second street station and informe. the officers that Wirth's body would be found in the river near the red bridge, at Archer avenue. He sald there were weights fas tened to it. Not much reliance was placed on Kuebler's story, as he had the appearance of an insane man. Officers were sent to the red bridge and are dragging the river in that vicinity, but so far their efforts have been

Trial of the Alleged Rock Island Robbers. Monris, Ill., March 23.-The trial of Schwartz and Wait for the murder of Express Messenger Nichols has commenced here. WONDERFUL SURGERY.

Tendons from a Dug's Leg Transferred to a Man's, Restoring Use of the Limb.

NEW BEDFORD, Mass., March 23 .- The success of a wonderful surgical operation, performed in this city nearly a year ago, has just heen demonstrated. Seventeen years ago Edward K. Russell met with an accident in which the tendons in one of his legs were severed, rendering the limb uscless. The operation consisted of the transferring of two tendons from a dog, which had been etherize I for the purpose, to Russell's limb, where they were united with the severed tendons in that member.

For ten months after the operation Russell was not allowed to use his leg, but within a few days he has been allowed to exercise it. He has now resumed his work, and has complete control of his limb, the operation having proved to be an entire success. This is the first time that this operation has been performed in this country, though it has been previously attempted with only partial

JUDGE W. H. WILLIAMSON, Who married the widow of General John H. Morgan, died at his home in Lebanon, Tenn., last week.

THE Free Turnpikers, of Bourbon County, have found a candidate for Representative at last. They area small band, but exhibit pluck. Certain defeat awaits them, however, next August.

THERE are lots of prohibitionists in right kind of men. both the Democratic and Republican party, but in the election of State officers next August, but very few of them will cast their vote for Judge Fox.

THE Emperor of Germany was ninety years old yesterday. It is a rare thing, indeed, for a ruler to reach such an age, and prince and peasant rejoiced with the venerable man, who controls the destiny of the German Empire.

THE Bourbon News thinks Lexington wants the earth, and intimates that "if newspaper wind and Chamber of Commerce resolutions win" the metropolis of the blue-grass region will get all she wants. Brother Champ shouldn't fret and worry himself over the matter. It's part of a newspaper's business nowadays to fight for the people who supports it, and to "boom" its home.

A COMPANY is being organized to bore for natural gas in or near this city. The stock is divided into shares of \$25, and about thirty shares have already heen taken. The property owners should not hesitate to invest in this undertaking. It will not take a great deal lo test the matter, and where it is divided out among many the loss would be but trifling should no gas be found. Now is the time should no gas be found. Now is the time to decide the question.

The officials, who over they are, should be proud of the bridge across the creek at the fill. It is, we are told, in a very precarious condition, thereby can lug our out-of-town friends to keep from coming here, losing to our merchants many dollars. Can there be no remedy applied?

"Where there is a will there is a way," is as old as the hills. We have some young men who had the will but the way happened to be disputed by the old man with a No. 14, cow-hide boot hung on his redals. AN INTERVIEW IN THE WATER.'!

How a Woman Once Interviewed John Qulucy Adams.

As a boy, being fond of bathing in the Potomac, I frequently resorted thither at early hours of summer mornings. The favorite point for such enjoyment was at "the sycamores," so called because a group of those trees stood on a certain part of the shore. 'I'le location was in the immediate vicinity of the present Washington monu-There I had sometimes the honor of attempting to rival the natatory skill of John Quincy Adams. It was his custom to seek the refreshment of the River of Swans -Pow-tow-mack-at the dewy hours of 4 or 5 a. m. My young companions and I encircled him as minnows may swim about a whale, but with no fear, for among children he was as a child.

A strange incident occurred there one day. Mrs. Anno Royal, a stout, aged, and occentric widow of a Revolutionary soldier, had come to Washington some time before and undertaken the publication of a weekly paper ontitled "The Huntress," in size little beyond a sheet of foolscap, blurred print, and more typographical errors than lines. Biographical accounts of gentlemen of the cabinet and of congress were its main features, with notices, too, of distinguished ladies of the metropolis. If the clite furnished her, on her call, with proper data and proper pay, their lives were made glorious in the next number of the unique journal, and they were also presented as angels, either mascuine or feminine; but if her visit, as did happen now and then, met with refusal, the imaginative editor would invent wonderfui circumstances and attribute them to such personages. These, in publication, startiod and even terrified the subects thereof and all their society friends. So it became necessary to buy off the vengeful madam and to obtain from her a pleasant report.

No paper of the period in Washington, not even the stately and venerabio National Intelligencer, could compare in extent of local subscription with the list of "The Huntress." The active and resolute madam would have it, and made it so, by going from house to house, office to office, stores, departments of the government-iu a word, everywhere.

The enterprising widow had long sought an opportunity to pay her respects to the Hon. Join Quincy, but somehow-perhaps John Quincy knew-fate failed to favor her. She chanced to learn the early summer morning practice of his late excellency, and the very next day repaired to the river and the sycamores. There he was, serenely disporting. She looked on with seif congratulation. The swimmer approached the shore at last, nearer and nearer, till he observed her ladyship in waiting, then, the stream admitting, stood, head and neck oxposed above the surface.

Thus situated, a prisoner, she addressed him, introduced herself, and held sufficient talk to furnish subject for a fine article in the following "Huntress," which accomplished, she retired, and once more all was 'quiet on the Potomac."—Seaton Donoilo in Brooklyn Magazine.

Strange But True.

"Strange but nevertheless true." The animal that bit Rev. R. B. Garrett Monday night, while he was coming up Second near C. B. Pearce's residence, was not a worthless cur, but a musk-rat. We believe it is the first time a musk-rat was ever known to attack a person, and it is hard to account for the animal's strange actions, as well as for its being found so far from a stream of water. Mr. Garrett's wound is still paining him considerably.

AT GERMANY'S CAPITAL.

CELEBRATING EMPEROR WILLIAM'S NINETY-FIRST BIRTHDAY.

Berlin a Blaze of Glory Over the Event. The Emperor in the Best of Health and Spirits-An All Night Session in the London House of Commons-Foreign.

BERLIN, March 23.-The ninetieth birthday of Emperor William was celebrated with great eclat throughout Germany. This city berowded with people from all parts of the em pire and the world, who have come for the purpose of witnessing the ceremonies in honor of the event. The first-class hotels are filled with royalty. The weather was fine and the enthusiasm of the people unbounded.

The emperor continues in the best of health and spirits. He received the royal guests at the palace at 11 o'clock. The reception appeared in no way to fatigue him, and he repeatedly appeared at one of the windows bowing his acknowledgment of the enthusiastic cheers which reached his ears from the crowds on the street below.

·Rumors are flying thick and fast of important appointments and promotions.

Among them are the statement that the grand duke of Baden is to be made king of Baden, and that Prince Bismarck is to be created duke of Lavenburg.

Archduke Rudolph, the crown prince of Austria, who represents the house of Hapsburg at the festivities, had a prolonged con-ference with Prince Bismarck to-day during which the chancelior assured him that Gormany's policy was pacific, and that the peace of Europe for the present year at least was now assured. The disquiotude in the east and west, Prince Bismarck declared, was also without cause.

All Night Session.

LONDON, March 23.-The house of commons has been in session all night and is still sitting. The time has been consumed in efforts by the government to dispose of the civil service credits of the naval office. Tho Parnellites are contesting every step, and resorting to every available means for obstructing their passage. The house is sitting in committee of supply. The discussion on the items of credit requested by the government for the use of the civil service branch of the naval office is for the most part of a farcical character and there is no likelihood of the committee rising, Mr. William Henry Smith, the Conservative leader of the house, having declared that the credits must be passed before the house adjourns.

The Naval Review.

LONDON, Murch 23 .- Tho naval review in houor of the queen's jubilee will take place on July 23, on which occasion the house of commions will be adjourned and the members witness the spectacle in a body.

Governor Gordon telegraphs that he is unable to stay the proecodings, but will do all in his power to have justice done. Four indictments for forgery have been made out in Augusta against Blackwood.' The Georgia press is indignant over the stand Governor Richardson has taken and the papers of this state are pretty hot about the proceedings of the Georgia officials. The circumstances of Biackwood's arrest are as follows: He was in his house, attending at the bedslde of his wife, who was in a dying condition. Two strangers came to the door at 11 p. in, and asked for a drink of water. Blackwood took it to them and was confronted by a pair of revolvers in his face. He was handculfed and the house searched for evidence of his guilt, and then his kidnapers took him across the river into

Raliroad Election.

Philadelphia, March 23.—The directors of the Pennsylvania Railroad company's annual election is in progress to-day. All the present board will be re-elected, there being no opposition. An incident was the appearance of Mr. Clarence Cary, the New York attorney for the so-called London committee that demanded a distribution of the company's surplus. He presented six proxies but was told that he could only vote three in his own name, as there was a state law against it. The proxies were refused and the lawyer and he expected it.
